Ger30Mar20

Esp35Jan20

Neth25Jan20

*** Futures must contain the alpharithmic MonthYear(MMM/YY) after the name.**

For example: Usa500Mar20. Names without the date (aka indicies) are not considered by EA as valid tickers. If, while you're searching the Market Watch, find a future with 2 different dates (for example Usa500Jan20 & Usa500Mar20) the valid future is the latest one (in this case the Usa500Mar20).
